The Hebrew University of Jerusalem

The Infinitive in Biblical Hebrew

Edit Doron, The Hebrew University of Jerusalem

1. Introduction

Biblical Hebrew (BH) verbal forms manifest rich inflection within the finite (Fin) clause, encoding the functional categories of temporality (T), mood (Mood), grammatical aspect (Asp), and modality (Mod). These categories have been widely discussed in the literature, and their relative role is still under debate (recently Hatav 1997, 2008, Joosten 2002, Cook 2006, 2012 and others). In particular, Asp and Mod have proven hard to disentangle in the morphology of the BH verb. The present work will reflect this by assuming that these two categories are composed together as Asp/Mod (AM) in the inflection of the verb.

Objectives of the paper are to show that:

- I. The same functional categories which determine the inflection of the BH finite verb also determine the feature specification of the BH infinitive. (In particular, the functional categories of the BH infinitive are clausal rather than nominal (section 4).)
- II. BH has a single infinitive combined with different inflectional categories, yielding the so-called *Infinitive Absolute* and *Infinitive Construct*, which, together with the finite (Fin) verb, gives rise to 4 clause types: Fin, Poss-inf, PRO-inf, and Nom-inf.
- III. These clause types are classified by their highest functional projection T_{Fin} , T, AM, Mood, which accounts for their distribution.
- IV. There is a concomitant 4-way alternation of attachment options of subject and object clitics to the verb: [+Scl+Ocl], [+Scl-Ocl], [-Scl+Ocl], [-Scl-Ocl].

The examples in (1) illustrate, using the same verb *remember*, the Fin and infinitival clause types in their typical functions. The Fin construction is a clause in the indicative mood, or in a variety of irrealis moods (imperative/ jussive/ cohortative), and Nom-inf is an irrealis root clause. Irrealis mood endows the clause with illocutionary force. Poss-inf and PRO-inf are embedded clauses lacking force, and their distribution will be discussed in detail below. Poss-inf often functions as a temporal adverbial, and PRO-inf – as a purpose adverbial:

1.a Fin

i. Indicative

וֹיָזְבֹּר יוֹסֶף אֵת הַחֲלֹמוֹת אֲשֶׁר חַלַם לָהֶם (בראשית מב 9)

wayyizkōr yōsēp̄ ?ētha-hălōmōt ?ăšer hālam lā-hem and.remembered.3MS Joseph ACC the-dreams that dreamt.3MS to-3MP Then Joseph remembered the dreams which he had dreamed about them. (Gen. 42:9)

ii. Imperative

(דברים ט 27)

זָכֹר לַעַבָּדֵידְ לְאַבְרָהַם לִיִצְחָק וּלִיַעַקֹב

zaķōr la-Ṣaḇāḍε-kā la-ʔaḇrāhām la-yiṣħāq ū-la-yaṢaqōḇ remember.IMPR.2MS to-servants-POSS.2MP to-Abraham to-Isaac and-to-Jacob Remember Your servants, Abraham, Isaac, and Jacob. (Deut 9:27)

b. Nom-inf

יָ**כוֹר** אֶת-יוֹם הַשַּׁבָּת לְקַדְּשׁוֹ (שמות כ 7)

zāķōr ?et yōm haš-šabbāt lə-qaddəš-ō

remember.INFABS ACC day.CS the-sabbath to-sanctify.INF-ACC.3MS

Remember the Sabbath day, to keep it holy. (Ex. 20:8)

¹ The distinction between the BH Poss-inf and PRO-inf, which serves the base of the distinction between the Modern Hebrew Gerund and Infinitive, is already found in Doron 2016, 2019.

c Poss-inf

עַל נַהַרוֹת בַּבֶל שַׁם יַשַּׁבָנוּ גַּם-בַּכִינוּ בַּ**זָכְרֵנוּ** אֵת-צִיוֹן (תהילים קלז 1)

Sal nahărōt bābel šām yāšab-nū gam bākī-nū bə-zokr-ēnū 2et ṣiyyōn by rivers.CS Babylon there sat-1P also wept-1P when-remember.INF-POSS.1P ACC Zion By the rivers of Babylon, there we sat down and wept when we remembered Zion. (Ps. 137:1)

d $PRO-inf^2$

ן הָיְתָה הַקֶּשֶׁת בֶּעֶנֶן וּרְאִיתִיהָ **לִּזְכּר** בְּרִית עוֹלֶם בֵּין אֱלֹהִים וּבֵין כָּל-נֶפֶשׁ חַיָּה (בראשית ט 16) אינתיה הַקֶּשֶׁת בָּעֶנֶן וּרְאִיתִיהָ **לִזְכּר** בְּרִית עוֹלֶם בֵּין אֱלֹהִים וּבֵין כָּל-נֶפֶשׁ חַיָּה (בראשית ט 16) wəhāyətַ-ā haq-qɛšɛtַ bɛ-ʕānān ū-rəʔī-tַt̄-hā and.be.MOD-3FS the-rainbow.F in.the-cloud and-will.see-1S-ACC.3FS

li-zkōr bərī<u>t</u> Sōlām bēn Pělōhīm ū-bēn kol nepēš ħayyā **to-remember.INF** covenant.CS eternity between God and-between all soul living

The rainbow shall be in the cloud, and I will look on it **to remember** the everlasting covenant between God and every living creature. (Gen. 9:16)

The Poss-inf suject is in the possessive case, overtly marked for pronomial subjects, in particular the 1^{st} person singular, where the possessive marking differs from accusative marking of the corresponding object clitics in the PRO-inf construction. Thus, the 1^{st} person object clitic $-\bar{e}n\bar{i}$ in (2a) differs in form from the 1^{st} person subject clitic $-\bar{i}$ in (2b):

2.a PRO-inf

הַלְ**[הָרְגֵנִי PRO**] אַתָּה אֹמֵר כַּאֲשֶׁר הָרַגִּתָּ אֶת-הַמִּצְרִי (שמות ב 14)

ha-lə-[hārḡ-ēnī PRO] ?attā ?ōmēr ka?ăšɛr hāraḡ-tā ?ɛt ham-miṣrī Q-to- [kill.INF-ACC.1S PRO] you intend.PTC.MS as killed-2MS ACC the Egyptian

Do you intend to kill me as you killed the Egyptian? (Ex. 2:14)

b Poss-inf

וָלא-יָהָיֶה בַּכֶם נָגַף לִמַשְׁחִית בָּ[**הַכּּתִי בְּאֵרֵץ מִצְרַיִם**] שמות יב 13)

wə-lō yihye <u>b</u>-ā<u>k</u>em ne<u>g</u>ep lə-mašhī<u>t</u> and-NEG be.MOD at-2MP plague to-destroy.PTC.MS

bə- [hakkōt-ī bə-ʔereş miṣrāyīm] when-[strike.INF.POSS.1S at-land.CS Egypt]

And the plague shall not be on you to destroy you when I strike the land of Egypt. (Ex. 12:13)

3.a Fin [+Scl+Ocl]

Săśī-<u>t</u>ī-w עַשִּׂיתָיו

made-1s-ACC.3MS

b Nom-inf [-Scl-Ocl]

make.INFABS

c Poss-inf [+Scl-Ocl]

ba-รăśō<u>t</u>-ī יאַוֹּתֵי

when-make. INF-POSS. 1S

d PRO-inf [-Scl+Ocl]

 $la-\S \check{a} \check{s} \bar{o} \underline{t} - \bar{e} n \bar{t}$ לַעֲשׂוֹתֵנִי

to-make.INF-ACC.1S

² It should be clear that the contrast between the overt vs. covert subject in Poss-inf vs. PRO-inf is **grammatical** and has nothing to do with the **pragmatic** contrast between overt and null pronominal subjects in finite clauses like (i), where the overt/covert choice has to do with information structure:

4.a Fin

הַגּוֹיִם אֲשֶׁר **הוֹצֵאתִים** לְעֵינֵיהֶם (יחזקאל כ 14)

hag-gōyim ʔăšer hōṣē-tī-m lə-Sēnē-hem the peoples that **brought.out-1S-ACC.2MP** to-eyes-POSS.3MP the peoples in whose sight **I had brought them out** (Eze. 20:14)

b PRO-inf

לָהוֹצִיאָם מֵאֶרֵץ מִצְרָיִם (שמות יב 42)

la-hōṣīʔ-ām mē-?εrεṣ miṣrāyim **to-bring.out.INF-ACC.3MP** from-land.CS Egypt for **bringing them out** of the land of Egypt (Ex. 12:42)

c Poss-inf

בּהוֹצִיאִי אוֹתָם מֵאֵרֵץ מִצְרָיִם * בָּהוֹצִיאִים מֵאֵרֵץ מִצְרָיִם (ויקרא כג 43)

**ba-hōṣī?-ī partitus partitus
partitus partitus partitus partitus partitus
partitus partitus partitus partitus partitus
partitus partitus
partitus partitus p**

* bə-hōṣīʔ-ī-m mē-ʔereṣ miṣrāyim when-bring.out.INF-POSS.1S -ACC.3MP from-land.CS Egypt

The ungrammaticality in the (c) example above is not due to "heaviness" of two combined clitics, since even if the subject is not a pronominal clitic but a full lexical item, even then an object clitic is impossible in the Poss-inf construction:

5. Poss-inf

a (בראשית ד 15) אַ יְהוָה לְקַיִן אוֹת לְבִלְתִּי הַ**כּוֹת-אֹתוֹ כָּל-מֹצְאוֹ** * לְבִלְתִּי הַכּוֹתוֹ כָּל-מֹצְאוֹ (בראשית ד 15) wayyāśɛm YHWH la-qayin ʔōt la-biltī hakkōt ʔotō kol mōṣʔ-ō and.put.3MS Lord to-Cain mark to-NEG kill.INF ACC.3MS any find.PTC.MS-POSS.3MS And the Lord set a mark on Cain, lest anyone finding him should kill him.(Gen. 4:15)

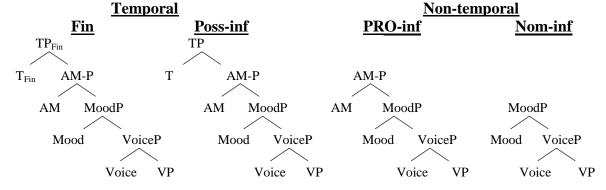

* lə-biltī **hakkōt-ō** kol mōṣʔ-ō to-NEG **kill.INF-ACC.3MS** any find.PTC.MS-POSS.3MS

b (יהושע יד 7) בּן-אַרְבָּעִים שָׁנָה אָנֹכִי בִּשְׁלֹח**ַ מֹשֵׁה עֵבֶד-יִהוָה אֹתִי** ... * בִּ**שַּׁלְחֵנִי** מֹשֵׁה

ben ?arbāsīm šānā ?ānōkī bi-šəlōah mōše sebed JHWH ?ōtī son.CS forty year I when-send.INF Moses servant.CS Lord ACC.1S I was forty years old when Moses the servant of the Lord sent me... (Josh. 14:7)

* **ba-šolh-ēnī** mōšɛ when-send.INF-ACC.1S Moses

6. The four clausal types are distinguished by what Wurmbrand 2001, 2014 has called their restructuring signature: how much of the hierarchy of clausal functional categories is projected in the clause.

7.

highest inflection	+T	-T
+ verbal	Fin [+Scl+Ocl]	PRO-inf [-Scl+Ocl]
– verbal	Poss-inf [+Scl-Ocl]	Nom-inf [-Scl-Ocl]

This corresponds to what has often been remarked in the literature: object clitics attach to inflection which is characteristically verbal (e.g. in Romance, Cardinaletti and Shlonsky 2004, Cardinaletti 2008).³

2. One infinitive, different inflectional categories

Historically, the Infinitive Absolute (INFABS) is the original infinitive, also found in Akkadian (Blau 1979:§30), while the Infinitive Construct (INF) has been claimed to originate in a different Proto-Semitic form, related to the imperfective (Bauer and Leander 1922:§43). Yet, synchronically in BH, I would like to propose that the two are actually two inflectional forms of a single infinitive. The derivations are shown in the following table:

	^		
		′	
	•		

Ager	Agency Simple		Intensive		Causative		
Voice Active	<i>šamōr</i> observe.INFABS	<i>šəmōr</i> observe.INF	kabbēd honor.INFABS	<i>kabbēd</i> honor.INF	haqrē <u>b</u> offer.INFABS	<i>haqri<u>b</u></i> offer.INF	
Middle	hiššā <u>b</u> aς vow.INFABS	hiššā <u>b</u> a\$ vow.INF	hitnappēl attack.INFABS	hitnappēl attack.INF			
Passive			gunnōb be-stolen.INFAB	<i>hukkabbēs</i> S be-laundered. INF	huggēd be-told.INFABS	hulledet be-given- birth.INF	

The Infinitive Absolute is the citation form of the verb, and has adverbial uses (typically bare of arguments). The adverbial infinitive either directly modifies the inflected verb (9a-b), as described in Callaham 2014, Hatav 2017, and references therein, or it modifies the VP (9c-d):

9. (אָר בְּמִצְרָיִם (שמות ג 7) מוּ מּמִי אֲשֶׁר בְּמִצְרָיִם (שמות ג 7) מ מוּ מּמִי אָת-עֲנִי עַמִּי אֲשֶׁר בְּמִצְרָיִם (שמות ג 7) מ מ מוּ רּמַּיִס מּמִי אַת יְּמָי אַשָּׁר בְּמִצְרָיִם (שמות ג 7) מ מוּ מּמִי מּמִי אָת-עָנִי עַמִּי אֲשֶּׁר בְּמִצְרָיִם (שמות ג 7 מַמְּיִּ אַמָּי אֲשָּׁר בְּמִצְרָיִם (שמות ג 7 מַמְּיִּ אַת מַמְּי אֲשָׁר בְּמִצְרָיִם (שמות ג 7 מַמְּיִ אָת מַמְּי אֲשָׁר בְּמִצְרָיִם (שמות ג 7 מַמְּי אָת מַמְּי אֲשָׁר בְּמִצְרָיִם (שמות ג 7 מַמְּי אָבְיִים (שמות ג 7 מַמְּי אָבָי אָת מְּיִּ אָשֶּׁר בְּמִצְרָיִם (שמות ג 7 מַמְּי אָבְייִם (שמות ג 7 מַמְּי אָבְייִם (שמות ג 7 מַמְּי אָבְייִם (שמות ג 7 מַמְי אָבְייִם מְּיִּי אָבְייִם (שמות ג 7 מַמְי אָבְייִם (שמות ג 7 מַמְי אַבְּי אָבְייִם מְיִּי אֲשָּׁר בְּמִצְרָיִם (שמות ג 7 מַמְי אָבְייִם מִּי אָבְייִם מְּיִּבְייִים מִּיִּי אָבְייִים מְּיִים מְּיִּים מִּיְּים מִּיְּבְיִים מִּיִּים מְּיִּבְּיִים מְּיִּבְיִים מִּיִּים מְּיִבְּיִים מִּיִּים מְּיִּבְיִים מִּיְּבְיִים מִּיִּים מְּיִּבְּים מִּיִּבְיִים מִּיְּבְיִים מִּיְּבְיִים מְּיִּבְּיִים מְּיִּבְיִים מְּיִּבְּיִים מִּיִּים מְּיִּבְיִים מְּיִּבְּיִים מְיִּיִּים מְּיִבְּיִים מְיִּבְּיִים מִּיִּבְּיִים מְּיִים מְּיִּבְּיִים מִּיִּים מְּיִּבְּיִּבְיִים מִּיִּבְּיִים מִּיִּים מִּיִּים מִּיִּים מְּיִּבְּיִים מְּיִּבְּיִים מִּיִּים מִּיִּבְּיִים מְּיִּבְיִים מִּיִּבְּיִים מְּיִּבְּיִים מִּיִּים מִּיִּבְייִים מְּיִים מִּיִּים מְיִּים מְּיִּים מִּיִּבְּיִים מִּיִּים מִּיִּים מִּיִּים מְּיִים מְּיִים מְּיִּים מִּיְיִּים מִּיְיִים מְּיִים מְּיִּים מְיִים מְּיִים מְּיִּים מְּיִים מְּיִּים מְּיִּים מִּיְיִים מִּים מְּיִּים מִּיְיִים מְּיִים מְיִּים מְּיִּים מְיִּים מְיִּים מִּיְיִים מְיִּים מְּיִּייִי מְיִּיִּים מְיִּים מְּיִים מְּיִּים מְּיִים מְּיִים מְּיִּים מְיִּים מִּיְיִים מְּיִּים מְּיִים מְּיִּים מִּיְים מְּיִים מְּיִּים מִּיְיִים מְּיִים מְּיִּים מְּיִים מִּיְיִים מְּיִים מְיּיִּים מְיִּים מְיִּים מְּיִּים מְיּיִּים מְּיִּים מְּיִּים מְּיִּים מְיִּים מְּיִּים מְּיִּים מְּיִּים מְּיִּים מְיִּים מְּיִּים מְּיִים מְּיִים מְּיִּיְיְיִים מְּיִּים מְּיִּים מְּיִּים מְּיִּים מְּיִּים מְּיִּים מְיִּים מְּיִּים מְ

שׁוֹב אָשִׁידָ כָּעֵת חַיָּה וְהִנֵּה-בֵּן לִשָּׂרָה אִשְׁתֵּדְ (בראשית יח 10)

b

 $m\bar{o}$ ş $?-\bar{\iota}$ $m\bar{o}$ san $?-\bar{\iota}$ $s\bar{o}l\hbar-\bar{\iota}$

find.PTC.MS-POSS.1S deliver.PTC.MS-POSS.1S hate.PTC.MS-POSS.1S send.PTC.MS-POSS.1S anyone who finds me (Gen. 4:14) He delivers me he who hates me (Job 31:29) (2Sam.24:13)

Yet the participle exhibits noun/verb duality, and there are also a few cases where it heads a finite clause with accusative object clitics:

hā-?ēl ha-mə?azzər-ēnī hāyil (33) הָאֵל הַּמְאַזְּרֵנְי חָיָל (תהילים יח 33)

the-God that-arm.PTC.MS-ACC.1s strength It is God who arms me with strength (Ps. 18:33[32])

³ Indeed the participle, which is inflected as a noun, mostly takes genitive marked object clitics:

⁴ The Infinitive Absolute of some verbs in derived templates also has exponents constructed by analogy to the Simple Active template, e.g. *nilhōm* 'fight', *yassōr* 'chasten'. Note: passive infinitives are extremely rare.

Sōb ?āšūb ?ēl-ɛkā kā-Ṣēt ħayyā wə-hinnē bēn lə-śārā ?išt-ɛkā **return.INFABS return.MOD.1S** to-2MS as.the-season living and-behold son to-S. wife-your **I will surely return** to you when the season comes round again, and behold, your wife Sarah will have a son! (NET; Gen. 18:10)

d

?ēt kol ?ăšer dibbar-tī ?el bēt-ōhāhēl wə-kallēACC all that spoke-1s to house-POSS.3MSbegin.INFABS and-end.INFABS

In that day I will perform against Eli all that I have spoken concerning his house, **from beginning to end**. (1Sam. 3:12)

For the purposes of the present article, I will mostly ignore the adverbial use (9), where the infinitive is "bare" of any functional category, and hence is not clausal and does not introduce a subject.⁵

I will only be interested in the uses of the infinitive which involve clausal constructions with functional categories, and hence a subject. The present work shows that there are two types of such constructions, one classified together with finite clauses as having conversational force (through being specified for Irrealis Mood), and the other – as lacking such force.

3. Two types of infinitival clauses

3.1 [-Indicative] infinitival clauses

The first type is a clause with imperative force (including jussive and cohortative). The inflectional class of the infinitive in this clause type is the Infinitive Absolute. According to the analysis proposed here, this is due to the fact that the only functional category specified in this construction is Mood, with a [-Indicative] value interpreted as imperative force. Since the TAM categories in the clause are unspecified, there is no inflection to alter the citation form of the infinitive, nor to provide an attachment site for subject and object clitics. And as there is no temporal anchoring of the verb to the speech act, these sentences tend to be generic in interpretation unlike the discourse-bound interpretation of the finite imperative. I call this type *Nom-inf*, since it includes a nominative subject, either a null *pro* (an addressee-

וֹאת נַעֲשֶׂה לָהֶם, וְ**הַּחֲיֵה** אוֹתָם (יהושע ט 20)

(i) $z\bar{o}\underline{t}$ $naS\check{a}\acute{s}\varepsilon$ $l\bar{a}$ - $h\varepsilon m$ wə- $hah\check{a}y\bar{e}$ $?\bar{o}\underline{t}\bar{a}m$ this do.MOD.1P to-3MP and-let.live.INFABS ACC-3MP

This we will do to them: we will let them live (Josh. 9:20)

⁵ I consider adverbial also the "sequential use", where the Infinitive Absolute, together with its internal arguments, is conjoined to a previous clause and interpreted within the scope of the latter's inflection and subject:

⁶ The same is true in Arabic, where the *qatāli* form which corresponds to the Infinitive Absolute also serves as an imperative (Wright 1874: Vol 1, p.62).

⁷ As is know from the literature (Portner 1997 and references therein), Mood is the category which determines the conversational force of a root clause (Indicative, Imperative, etc.)

⁸ Thus (10) is a general obligation, not restricted to any particular time and place, whereas (11) is restricted to the speech situation. The same contrast is found between the generic $l\bar{o}$ +Modal negation and the eventive 2al+Jussive negation among Fin clauses.

oriented logophoric pronoun), as in (10a), or a lexical DP, as in (10b). As is to be expected of imperative clauses, they are typically root clauses (Palmer 2001).

10. Nom-inf

a (דברים ה 11) שָׁמוֹר אֶת-יוֹם הַשַּׁבָּת לְקַדְּשׁוֹ (דברים ה 11) אָת-יוֹם הַשַּׁבָּת לְקַדְּשׁוֹ (דברים ה $\ddot{s}\bar{a}m\bar{o}r$ $\raiset{S}\bar{a}m\bar{o}r$ \r

observe.INFABS ACC day.CS the-sabbath to-sanctify.INF-ACC.3MS

Observe the Sabbath day, to keep it holy. (Deut. 5:11(12))

b (זיקרא ו 7) הַמְּנְחָה: הַּקְּרֵב אֹתָהּ בְּנֵי-אֲהָרֹן לִפְנֵי יְהוָה אֶל-פְּנֵי הַמִּוְבָּח וּיקרא ו $wa-z\bar{o}\underline{t}$ $t\bar{o}ra\underline{t}$ $ham-min\hbar\bar{a}$ and-this.F (is) law.F.CS the-grain.offering.F

This is the law of the grain offering: **The sons of Aaron shall offer** it on the altar before the Lord. (Lev. 6:7[14])

11. Fin Imperative

a

שְׁמֹר אֶת-הָאִישׁ הַזֶּה (מייא כ 39)

§amōr $2\varepsilon t h\bar{a}-2\bar{t}s haz-z\varepsilon$ **guard.IMPR.2MS** ACC the-man the-this **Guard** this man (1Kings 20:39)

and-you take.IMPR.2MS to-2MS ACC Aaron brother-POSS.2MS Now you take Aaron your brother (Ex. 28:1)

3.2. [+Indicative] infinitival clauses

The form of the infinitive in the second type of construction is the Infinitive Construct. This form allows the attachment of pronominal clitics, something that is strictly disallowed in the Nom-inf construction, which has the Infinitive Absolute form. As we have seen, this difference is due to the fact that subject and object clitics attach to the relevant functional categories, which are present in the second type of construction but not in the Nom-inf construction.

The first subtype, familiar from other languages, has a null pronominal anaphor subject (PRO), typically controlled by another DP in the linguistic context. This is the PRO-inf type. We will now see that it does not have temporal specification, i.e. no T functional category, yet it does have Asp/Mod specification. As it is not specified for T, the subject is not assigned case, and is hence PRO. As it is specified for Asp/Mod, which is verbal inflection, it allows object clitics.

The second subtype, Poss-inf, has an overt subject with possessive case, ⁹ I will now argue that this construction is temporal and hence includes specification of the functional category T. As it has T specification, but not a finite one, it allows subject but not object clitics. It is distinguished from finite clauses, with a finite T (and hence both subject and object clitics). I assume that it is non-finite T which assigns possessive case to the subject, in parallel to the

_

⁹ The possessive case is a marked case of the subject in other languages as well, such as Alaskan Yup'ik (Abney 1987:28), Finnish (Kiparsky 2001), Ladakhi, Lak, Niue (Lander 2011: 590), Tagalog (Aldridge 2006, Collins 2017), Tzutujil Maya (Abney 1987:31), and others.

non-finite -ing functional category which assigns accusative case to the subject of Acc-ing gerunds in English according to Reuland's 1983 analysis. 10

In the following examples of PRO-inf and Poss-inf, notice the Infinitive Construct foms ra?ōt 'see' and $\underline{s}\underline{u}\underline{b}$ 'return' in (12) and (13), which differ from the corresponding Infinitive Absolute forms $r\bar{a}\partial\bar{o}$ and $s\bar{o}b$ of the same verbs in (9) above.

12.a PRO-inf

וישלח שאול את-המלאכים ל[ראות PRO את-דוד] (שייא יט 15)

šā?ūl?et ham-mal?ākīm li-[r?ōt] wayyišlaħ PRO ?et dāwid and.sent.3MS Saul ACC the-messenger to-[see.INF PRO ACC David] Then Saul sent the messengers back to see David (1Sam 19:15)

Poss-inf

וָכָ**[רְאוֹת שַׁאוּל אֵת-דַּוִד**]....אַמַר אֱל-אַבְנֵר (שײא יז 55)

šā?ūl ?et dāwid] ... ?āmar *wə-ki-* [*rʔōt* Pel Pabnēr and-as-[see.INF Saul ACC David] said.3MS

When Saul saw David..., he said to Abner, (1Sam. 17:55)

13.a PRO-inf

וַיִשַּׁלַח אָת-הַיּוֹנָה וָלֹא-יַסְפָּה [שׁוּב PRO אֵלִיוֹ עוֹד] (בראשית ח 12)

PRO ?ēl-āw Sōd] wayəšallaħ ?ɛt hay-yōnā wə-lō yāsəpā [šūb and.sent.3MS ACC the-dove.F and-NEG repeated.3FS [return.INF PRO to-3MS anymore]

... and [he] sent out the dove, which did not return again to him anymore. (Gen 8:12)

Poss-inf b

בּ[שוֹב יָהוָה את-שיבת ציוון היינו כחלמים (תהילים קכו 1)

bə-[šūb YHWY ?E<u>t</u> šī<u>b</u>a<u>t</u> **şiyyōn**] hāyī-nū kə-hōlmīm when-[return.INF Lord ACC return.CS Zion] were-2P as-dream.PTC.MP

It seemed like a dream when the Lord brought us back to the city of Zion. (CEV; Ps. 126:1)

The two constructions contrast sharply in distribution. The (b) examples in (12) - (13) are temporal adverbials, and none of the (a) examples are. This is not an accident, as it is the case in general that temporal preposition only take Poss-inf complements, never PRO-inf complements. This shows that Poss-inf clauses include T specification in their structure, whereas PRO-inf clauses do no. Thus only the former can serve as Specifier of the main clause T head (Cinque 1999). PRO-inf clauses function as purpose clauses, as in (12a) and (15b), i.e. they are Asp/Mod phrases (AM for short) which are Specifiers to the Asp/Mod head of the main clause: 11, 12

וַשְׁמָרוּ דָּרֶדְ יִהוָה ... לְמַעַן [**הָבִיא יִהוָה עַל-אַבְרָהָם אֵת אֲשֵׁר-דְּבֶּר עַלֵּיו**] (בראשית יח 19)

¹⁰ It has often been noticed that the BH Infinitive Construct subsumes properties of both infinitives and gerunds in other languages. PRO-inf subsumes both the English infinitive and the PRO-ing gerund. Poss-inf parallels the English Acc-ing gerund, despite the morphological difference between accusative and genitive. Poss-inf does not parallel the English Poss-ing, which is a nominal rather than a clausal construction (Pires 2001, 2006, 2007; Moulton 2004).

¹¹ Purpose clauses are part of infinitival clauses which "are a group which displays a characteristic futureoriented, irrealis semantics" (Portner 1997: 183). Yet, as argued by Wurmbrand 2001, 2014, the seeming temporal relation of the infinitival clause to the main clause is not due to T but to Mod, which determines the inherent future orientation of purposes.

¹² Purpose clauses are distinct from rationale clauses (Jones 1985, Verstraete 2008), which can be expressed by the Poss-inf construction. The latter describes a result event, as in (i) below, not necessarily the outcome an agent's intentions, unlike the intentional/modal characterization of purpose clauses:

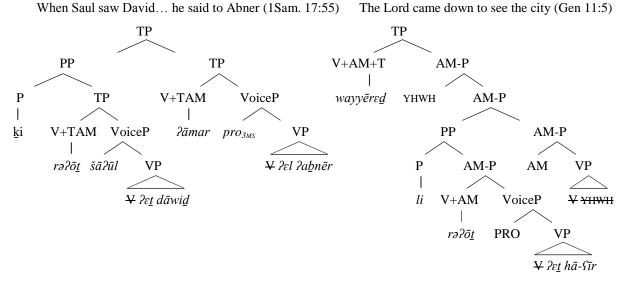

Poss-inf: rationale clause (i)

(15)a. Poss-inf Spec of T: temporal adverbial (cf. 6b)

ָוְכַרְאוֹת שָׁאוּל אֶת-דָּוִד....אָמַר אֶל-אַבְנֵר (ש״א יז 55)

wə-ki-rə?ōt šā?ūl ?et dāwid ?āmar ?el ?abnēr and-as-see.INF Saul ACC David said.3MS to Abner When Saul saw David... he said to Abner (1Sam. 17:55)

b. PRO-inf
Spec of Asp/Mod: purpose adverbial
(5 וְיֵבֶד יְהוָה לַרְאֹת אֶת-הָעִיר... (בראשית יא אַר יְהַעִּיר יִהוָה לַרְאֹת אֶת-הָעִיר...)
wayyēred YHWH li-rəʔōt ʔet hā-ʿsīr came.down.3MS YHWH to-see.INF ACC the-city

Infinitival clauses also function as complements, and as such are selected by different types of verbs. Poss-inf clauses are propositional TPs, and are hence selected by propositional attitude verbs, such as *know* (Gen. 19:35, Jer. 15:15), *remember* (Jer. 2:2, 18:20), *consent* (Gen. 19:21), *hear* (1Sam 14:27), *see* (Is. 52:8), illustrated in (16a).

PRO-inf clauses are Asp/ModP, and hence complements of aspectual verbs, e.g. *begin* (Judg. 20:39), *repeat* (1Sam 15:35), *stop* (1Sam. 23:13), *finish* (Lev. 16:20), or modal verbs such as *be able* (Deut 7:22), *want* (1Sam. 19:2), *intend* (Ex. 2:14), *plan* (Deut. 19:19), *refuse* (Num. 20:21), *give up* (1Sam. 27:1), *order* (2Sam. 17:14), *prevent* (Num. 22:16), illustrated in (16b).¹³

(16) a. Poss-inf
Complement of propositional attitute verb

(2בְּרָתִּי לֶּךְ ... [לֶּכְתֵּךְ אַחֲרֵי בַּמְּדְבָּר] ... [לֶּכְתֵּךְ אַחֲרֵי בַּמְּדְבָּר] $z\bar{a}\underline{k}art\bar{\iota}$ $l-\bar{a}\underline{k}...$ $le\underline{k}t-\bar{e}\underline{k}$ $2a\hbar\check{a}r-ay$ remember.1S to-2Fs go.INF-POSS.2Fs behind-1S I remember your following me... (Jer. 2:2)

b. PRO-inf
Complement of Modal/Aspectual verb

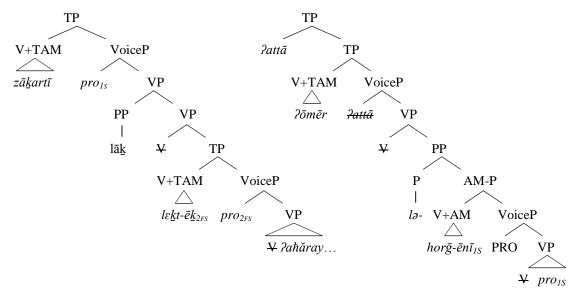

(14 שמות ב PRO אַתָּה אמֵר לְ[הָּרְגֵנִי 2attā ʔōmēr lə-horḡ-ēnī
you intend.PTC to-kill.INF-ACC.1s
You intend to kill me. (Ex. 2:14) cf. (2a)

wəšamərū derek YHWH ləmaSan [hābī YHWH Sal ʔabrāhām ʔēt ʔăšer dibber Sāl-āw] and.keep.MOD.3MP way.CS Lord for [bring.INF Lord on Abraham ACC that spoke.3MS on-3MS] that they keep the way of the Lord,..., that the LORD may bring to Abraham what He has spoken to him (Gen. 18:19)

One syntactic difference which distinguishes purpose and rationale clauses is that only the former allow an additional cotrolled empty category (glossed as e_i in the following example:

(ii) PRO-inf: purpose clause

¹³ As noted in Doron (2018), propositional attitude verbs receive a modal interpretation when they take PRO-inf complements, e.g. *know* (1Kings 3:7), *think* (1Sam 18:25), *hear* (Gen 39:10), *fear* (Judg. 7:10), *remember* (Ps. 109:16) and others.

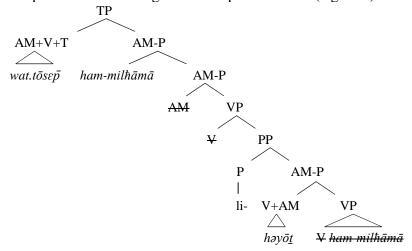

Aspectual and modal verbs in the (16b) structure are control verbs expressing root modality (ability, deontic). When the same verbs modify the aspectual and modal dimension of a state/event which is not determined by the actions or abilities of an agent, their modality is interpreted as circumstantial, they do not have an agent, and function as raising verbs (Hacquard 2011). The following examples describe the beginning (a), repetition (b), possibility (c) of an event/state,independently of an agent. The infinitival clause, which lacks T, undergoes restructuring with the main clause, and the subject of the infinitive is assigned nominative case by the main clause TAM:

17.a (בראשית יח 1) (בראשית אָרָה אָרָה אָרָה אָרָה אָרָה בָּנָשִּׁים) (בראשית יח 1) (בראשית הְּשָׁרָה אָרָה אָרָה אָרָה אָרָה בּנָשִּׁים) (בראשית יח 1) (בראשית יח 1) (הקיוֹת לְשָׂרָה אַרָה אַרַה בּנָשִּׁים) (הבראשית יח 1) (הקיוֹת לְשָׂרָה אַרַה בּנָשִּים) (הבראשית יח 1) (הקיוֹת לְשָׂרָה אַרַה אַרַה בּנָשִּׁים) (הבראשית יח 1) (הבראשית יח 1) (הקיוֹת לְשָׂרָה אַרַה אַרַה בּנָשִּׁים) (הבראשית יח 1) (הבראשית יח 1) (הקיוֹת לְשָׁרָה אַרַה אַרַה בּנָשִּׁרָה אַרַה בּנָשִּׁרָה בּנָשִּׁרָה הוֹת הַבְּיּשִׁרְה הּיח בּנָשְּׁרָה הוֹת הביים (הבראשית יח 1) (הבראשית יח

b (17 (שייב יז (שייב יז pro_{3MP} לָּבוֹא pro_{3MP} לָּבוֹא לִּלְּהָרָאוֹת אָּזּלּוֹ לְּנְהַרָאוֹת la-[$h\bar{e}r\bar{a}$?ot pro_{3MP}] $l\bar{a}$ -[$b\bar{o}$ pro_{3MP} $h\bar{a}$ -{ \bar{i} r- \bar{a}] for NEG **can.MOD.3MP** to-[be-seen] to-[come the-city.ILL] because they could not be seen entering the city. c (ש"א יט 8) (ש"א יט 8) עוּמּלְחָמָה [לָהְיוֹת הַּמִּלְחָמָה] (ש"א יט 4) wat.tōsɛp̄ ham-milħāmā li-[həyōtַ ham-milhāmā] and.recurred.3FS the-war.F to-[be.INF the war.F]
And there was war again (Gen. 19:8)

(18) Complement of a raising Modal/Aspectual verb (e.g. 17c)

I summarize in (20) the morpho-syntactic characteristics of the different finite and infinitival clauses, where the relevant functional categories are ordered by the hierarchy in (19):

19.
$$T < Asp/Mod < Mood < Voice$$

20.

Phrasal Category	Functional spine	Force	Verb form	Subj.	Subj.	Obj.
	+T _{Fin} +AM +Mood	+	Finite	Nom	+	+
TP	+T+AM+Mood	_	Inf. Constr	Poss	+	_
AM-P	-T+AM+Mood	_	Inf. Constr	_	_	+
MoodP	-T-AM+Mood	+	Inf. Abs.	Nom	_	_
	Category TP _{Fin} TP AM-P	$ \begin{array}{ccc} Category & & & & & \\ TP_{Fin} & +T_{Fin}+AM + Mood & & \\ TP & +T + AM + Mood & & \\ AM-P & -T + AM + Mood & & \\ \end{array} $	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$			

4. The clausal nature of the infinitive construction

The Hebrew grammatical tradition views the infinitive absolute as verbal, and the infinitive construct as nominal. The European grammatical tradition views both infinitives as mixed nominal/verbal categories. But the approach above has analysed (i) the infinitive as V rather than N, not even a deverbal N, and (ii) the functional categories projected by V as clausal rather than nominal – similarly to what has been shown by Pires 2006 for the English PROing and Accing gerunds, i.e. that they are clausal rather than nominal. There is a lot of evidence for both points.

First, the infinitive assigns accusative case to its direct object, as could be seen in all the examples above where the infinitive had a direct object.¹⁵ Moreover, object clitics attached to the infinitive are always accusative rather than genitive. In the case of nominal forms, such as the participle, one mostly finds genitive object clitics (fn. 3).

Second, the infinitive has no nominal morphological inflection of gender, number, or definiteness. The infinitive is case marked in a few examples by the accusative $2e\underline{t}$, as in (22a), but so are Fin CPs as in (22b):

۷.

בָּאַהֲבַת יְהוָה **אֶת-יִשְׂרָאֵל** לְעלֶם (מייא י 9) בְּאַהֲבַת יְהוָה **אֶת-יִשְׂרָאֵל** לְעלֶם (מייא י 9)

bə-ʔahăbat YHWH ʔɛt yiśrāʔēl ləʕōlām because-love.INF Lord ACC Israel forever Because the LORD has loved Israel forever (1Kings 10:9)

¹⁴ In English, Poss-ing gerunds are nominal.

Modern Hebrew allows nominalized verbs to assign accusative case as well, which is a a marked option crosslinguistically. This phenomenon originates in Medieval Hebrew under Arabic influence (Blau 1990, Goshen-Gottshtein 1951/2006). Yet it is not found in Biblical Hebrew, where forms such as *?ahăba* 'love', which were later recategorized as nouns, are still infinitives:

(i)

¹⁶ There are few cases where the infinitive happens to have feminine morphology, such as *love* in the previous fn. There are even fewer cases where the infinitive is preceded by the article *the*.

```
zə<u>k</u>ōr
                              Pal tiškaħ

        Remember! Do not forget how you provoked the Lord your God to wrath in the wilderness
        (Deut. 9:7)
Third, the infinitive is not modified by adjectives but by adverbs, such as the adverbs h\bar{e}t\bar{e}b
'well', \( \sigma \overline{o} d \) 'more', and \( mah \overline{e} r \) 'at once' in (23):
23.
                                                       וַאֶכַּת אתו טַחון הַּיטָב עַד אַשֵּר-דָּק לְעַבַּר (דברים ט 21)

   c
                                                                       לא תוכל כַּלתַם מַהָּר (דברים ז 22)
             tū<u>k</u>al
                                kallō<u>t</u>-ām
        lo
                                                      mahēr
        NEG be.able.MOD.2MS destroy.INF-ACC.3MP at.once
        you will be unable to destroy them at once (Deut. 7:22)
Fourth, despite the genitive case marking of its subject, the infinitive in the Poss-inf
construction is not a noun. It does not head a construct state phrase. Unlike the nominal
construct where the construct state (CS) noun must be absolutely adjacent to its complement,
the same is not true of the infinitive in the Poss-inf construction. Here, no adjacency is
required. The subject of the infinitive is separated from the verb in many examples,
something which never happens in a construct. The subject is separated from the infinitive
verb hakkot in (24a) by the accusative pronoun 2\bar{o}t\bar{o}, and similarly in the other examples in
(24):
24.
                                                                     לַבְלַתִּי [הַכּות-אֹתוֹ כַּל-מצְאוֹ]

זַכר אַל-תַּשְׁכַּח אָת אַשֶּׁר-הָקצְפָתַ אַת-יִהוָה אַלהֵידְ בַּמְּדְבַּר

b

(דברים ט 7)

We now turn to showing that embedded infinitival clauses have the distribution of embedded clauses rather than nominal projections. They are found as complements of prepositions, but only prepositions which take clausal arguments, including Fin CPs, for example the preposition k - 3 expressing similarity:

a (קא תֵצֵא **כְּצֵאת הָעֲבָדִים** (שמות כא 7) לא תֵצֵא **כְּצֵאת הָעֲבָדִים** (שמות כא 7) לא תֵצֵא **כְּצֵאת הָעֲבָדִים** אם lō tēṣē ka-ṣēṯ hā-Ṣăbādīm

NEG go.out.MOD.3FS **as-go.out.INF the.slaves.M**she shall not go out as the male slaves do (Ex. 21:7)

b (נְשְׁמְתָּ אֶתֶּם בָּאֲשֶׁרְ מְשַׁחְתָּ אֶתּר-אֲבִיהֶם (שמות מ 15) *umāšaħ-tā ʔōṯām ka-ʔăšer māšhħtā ʔeṯ ʔăḇīhem* annoint.MOD-2MS ACC.3MP **as-that annointed.2MS ACC father-POSS.3MP** You shall anoint them, as you anointed their father (Ex. 40:15)

Prepositions like *sim* 'with', which only take DPs complements and do not take Fin-CP complements, also do not take infinitival clauses. On the other hand, prepositions like *yasan* 'since', which do not take nominal complements in Classical BH but do take Fin-CPs, also take infinitival clauses:

26.

a (20-21 מייא כא 20-21 בְּעֵשׁוֹת הָרַע בְּעֵינֵי יְהוָה, הִנְנִי מֵבִי אֵלֶיךּ רָעָה (מייא כא 20-21 אַלֶּשׁוֹת הָרַע בְּעֵינֵי יְהוָה, הִנְנִי מֵבִי אֵלֶיךּ רָעָה (מייא כא 10-2 vasan hitmakker-akā la-săśōt hā-ras bə-sēnē yhwh since betook.INF-POSS.2MS to-do.INF the-evil in-eyes.CS YHWH

Moreover, like Fin-CPs, infinitival clauses function as relative clauses. (29a) has a Fin-CP relative clause, (29b) – a PRO-inf relative clause, and (29c) – a Poss-inf relative clause. 29.a Fin

```
נָל בָּשָׂר אֲשֶׂר-יַקְרִיבּוּ לַיהוָה (במדבר יח 15)

kol bāśār ʔăšɛr yaqrīḇū la-YHWH bāśār

all flesh [that bring.MOD.3MP to-Lord flesh]

all flesh which they bring to the Lord (Num. 18:15)
```

b PRO-inf

לֶחֶם **לָאֲכֹּל** (בראשית כח 20)

leħεm le-ʔεk̄ōl leħεm bread to-[eat.INF PRO bread] bread to eat (Gen. 28:20)

c Poss-inf

מַיִם לִשָּׁתֹת הַעָם (שמות יז 1)

mayim li- štōt hā-Ṣām mayim water to-[drink.INF the-people water] water for the people to drink (Ex. 17:1)

Negation is found with infinitival clauses, and it can be shown that negation takes scope over the entire clause rather than just modifying the infinitival head. Only clausal scope can give the correct reading in (30). Sacrificing to the Lord is the purpose of sending off the people, not the purpose of **not** sending off the people. Therefore, negation attaches to the full clause *letting the people go to sacrifice to the Lord* rather than to the head *letting go*. ¹⁷ 30.

```
(עמות ח 25) אַל-יֹסֵף פַּרְעה הָתֵל לְבָּלְתִּי [שַׁלַּח PRO אֶת-הָעָם לִּוֹזְבֹּח PRO אֶת-הָעָם לְוֹזְבֹּח PRO אַת-הָעָם לְוֹזְבֹּח PRO אַת-הָעָם לְוֹזְבֹּח PRO אַל-יֹסֵף פַּרְעה הָתֵל לְבָּלְתִּי [שׁׁלַּח PRO פַּרְעה הָתֵל לְבִּלְתִּי [שׁׁלַּח PRO פֹרְ hā-Ṣām NEG repeat.JUSS.3MS Pharaoh deceive.INF to-NEG [send.INF PRO ACC the-people li-[zbōaħ PRO la-YHWH]] to sacrifice PRO to-Lord]]
```

But let Pharaoh not deal deceitfully anymore in not letting the people go to sacrifice to the Lord. (Ex. 8:25[29])

5. Conclusion

.

The paper shows that Biblical Hebrew infinitival constructions are clausal rather than nominal, and that the functional categories which determine the inflection of the finite verb also determine the feature specification of the infinitive. Moreover, the morphosyntax of the different infinitival clauses determines their distribution. Nom-inf clauses are root clauses with irrealis Mood, hence have the conversational force of imperatives. PRO-inf and Poss-inf clauses are not specified for irrealis Mood, and thus have no conversational force. They therefore must be embedded clauses. The lack of T specification determines that the PRO-inf clause cannot be interpreted as an independent proposition, but is rather interpreted as part of

 $^{^{17}}$ In Modern Hebrew, the negative $bilt\bar{t}$ has grammaticalized into a prefix which attaches to lexical items, in particular adjectives.

the event denoted by the main clause, since it depends for its temporal anchoring on the temporal specification of the main clause. The Asp/Mod categoy of the PRO-inf construction allows it to function as complement of aspectual and modal verbs, and as specifier to Mod/Asp heads, i.e. as purpose clauses. The Poss-inf clause, on the other hand, contains a T head, and hence denotes a separate proposition from the one denoted by the main clause. Accordingly, it functions as a complement of propositional attitude verbs or a temporal/result specifier of the main-clause T. Moreover, the different categories T, Asp/Mod, and Mood in finite and infinitival clauses have been shown to explain the various possibilities of subject and object cliticization in the each type of clause.
